

MECHTRIC

Networking & Communication

Networking & Communication: Powered by Mechtric's Expertise and Global Partnerships

With over 60 years of industry experience, Mechtric proudly partners with world-class manufacturers to deliver innovative solutions.

Mechtric's Networking and Communication solutions include industrial switches, routers, and gateways that provide secure and reliable data exchange across connected systems. To support advanced monitoring and control, software platforms such as Polar Cloud and VTScada deliver powerful tools for real-time visibility, remote management, and process automation. Together, these hardware and software solutions enable seamless integration and efficient operation across industrial networks.

Through these partnerships, Mechtric delivers high-quality products, competitive pricing, and unparalleled technical support, empowering your business to perform at its best.

type	no. ports	operating temperature	alarm contact	no. fibre ports	description
------	-----------	-----------------------	---------------	-----------------	-------------

Layer 1: Unmanaged industrial Ethernet switches

Layer 1: Compact Ethernet switches (Unmanaged)

- Input voltage: 12 to 48 VDC
- 10 / 100 base-T(X), auto MDI / MDI-X, auto negotiation

DVS-005R00	5	-20...+70°C	—	—	entry level Ethernet switch
DVS-008R00	8	-20...+70°C	—	—	entry level Ethernet switch

Layer 1: Standard Ethernet switches (Unmanaged)

- IEEE 802.1p Class of service / quality of service, priority protocols (**8W01** and **16W01**)
- Input voltage: 2 sets, 12 to 48 VDC redundant terminal block input

DVS-005W01	5	-40...+75°C	yes	—	standard Ethernet switch
DVS-008W01	8	-40...+75°C	yes	—	standard Ethernet switch
DVS-016W01	16	-40...+75°C	yes	—	standard Ethernet switch

Layer 1: Gigabit Ethernet switches (Unmanaged)

- 10 / 100 / 1000 base-T, auto MDI/MDI-X, auto negotiation
- Input voltage: 12 to 48 VDC (2 set)
- 10Gbps, wired speed

DVS-G005100C	5	-40...+70°C	—	—	Gigabit Ethernet switch
--------------	---	-------------	---	---	-------------------------

Layer 1: PoE Gigabit Ethernet switches (Unmanaged)

- 10 / 100 / 1000 base-T PoE(PSE) ports. 2 x 100 / 1000 base-SFP
- Based on IEEE 802.3at standard up to 30W per port. Backward compatible with IEEE 802.3af

DVS-G406W01-2GF	6	-40...+70°C	yes	2 x SFP	PoE Gigabit Ethernet switch
-----------------	---	-------------	-----	---------	-----------------------------

Layer 2: Managed Ethernet switches

High-end Layer 2 management, redundant self-healing ring and a wide-operating temperature.

- Supports EtherNet/IP and Modbus TCP protocols for remote management by SCADA etc.
- IEEE 802.1X, TACACS+, SSH, HTTPS and SNMP v3 for enhanced network security
- Compatible with most industrial protocols, including: EtherNet/IP, Profinet, CC-LINK IE, DNP 3.0
- RJ45 ports: 10 / 100 / 1000 base-T, auto MDI/MDI-X, auto negotiation
- SFP ports: 100 / 1000 base-SFP

Layer 2: Managed Ethernet switches

DVS-G112W02-4GF	8	-40...+75°C	yes	4 x SFP	Managed Ethernet switch
DVS-G116W02-4GF	12	-40...+75°C	yes	4 x SFP	Managed Ethernet switch

DX-series - Industrial cloud solutions

input: 24 VDC

- Data acquisition equipment connected to DIA cloud servers
- Supports a two-way data collection channel between the device and the cloud
- Various peripheral interfaces include RS-485, RS-232 and LAN ports
- Built-in RTC and supports NTP time synchronization over a network
- Supports TCP/IP, UDP, ICMP, DHCP, HTTP, DNS, SSH, TCP and Modbus RTU protocols

Industrial Ethernet cloud router

(4-Port LAN FE + 1-Port WAN FE + 1 RS-232 + 1 RS-485)

The DX-2310LN is an IoT wired communication product of industrial grade. Includes Ethernet, RS232 and RS485 interfaces.

- Flexible connection method over WAN ports, e.g. static IP, DHCP client and more

DX-2310LN	5	—	—	1	-20...+70°C	cloud based VPN router
-----------	---	---	---	---	-------------	------------------------

Industrial 4G cloud router

(1-Port Lan + 1-Port WAN/LAN + 1-Port RS-485 + 1-Port RS-232)

The DX-2400L9 industrial router supports multiple mobile networks and provides internet access via WAN and cellular connections. It includes Ethernet, RS232, and RS485 interfaces

- Connect to AWS IoT MQTT Broker through MQTT protocol
- Universal LTE-FDD and LTE-TDD frequency bands
- Connect to internet through 4G cellular network or WAN broadband interfaces

DX-2400L9	2	—	—	1	-20...+70°C	4G/WAN cloud router
-----------	---	---	---	---	-------------	---------------------

Industrial 3/4G/WAN

(1-Port WAN + 4-Port LAN + 1-Port RS-232 + 1-Port RS-485)

- USB port can accept 3rd-party Wi-Fi USB adapter(only Realtek RTL8192EU driver supported)
- Universal 4G LTE-FDD and LTE-TDD frequency bands

DX-3021L9	5	2	2	1	-20...+70°C	cloud based 4G/WAN router
-----------	---	---	---	---	-------------	---------------------------

Industrial fieldBus Delta solution

Industrial automation products for converting communication signals of automation, servo and control devices. IFD communication modules are robust, high quality devices offering stable communication with in-built protection.

type	from	to	description
------	------	----	-------------

Ethernet to serial Modbus RS-232/485 Converters (full isolation)

IFD9506	RS-232/485	MODBUS TCP	converter (inc. power supply)
---------	------------	------------	-------------------------------

To configure IFD devices you need to install DCISoft

Serial to serial communication converters

IFD6500	USB	RS-485	converter (no ext. power supply required)
IFD6530	USB	RS-485	with 9V power supply (115.2k bps Max.)
IFD8500-A	RS-232	RS-422/485	RS-232 isolated converter
IFD8510	RS-485	isolated repeater/amplifier	(extends transmission to 1.2 km)

IFD65xx requires special driver to work with Windows OS, available on Delta website.

CAN / DeviceNet to serial converters

IFD6503	USB	CAN	CAN to serial converter

**Polar Monitoring - All-in-One Cloud-Based Monitoring**

Polar Monitoring offers a comprehensive, cloud-based monitoring solution tailored for the agriculture, commercial, and industrial sectors.

type	supply voltage	network connection	connector type	description
------	----------------	--------------------	----------------	-------------

Industrial LTE gateway

DIN mounting rail

IP40

LTE Gateways use the GSM/LTE mobile network to connect to the Polar Cloud Service. Gateways have a pre-installed SIM Card, managed by Polar Monitoring for user convenience.

- SIM: Pre-installed, no airtime/data required (*managed by Polar Monitoring*)
- Antenna Includes standard antenna (PM-A-2)

LTE solution

GL-PMGW-LTE	9 - 36 VDC	2G/LTE	terminal	LTE - Gateway (<i>within South Africa</i>)
-------------	------------	--------	----------	----------------------------------------------

Industrial Ethernet gateway

DIN mounting rail

IP40

The Ethernet Gateway requires an existing on site internet connection. It connects directly into an existing IP network via DHCP.

- DHCP client connects through firewall. No VPN or port forwarding required

Ethernet solution

GL-PMGW-ETH	9 - 36 VDC	Ethernet	terminal	Ethernet - Gateway
-------------	------------	----------	----------	--------------------

Industrial Edge gateway

DIN mounting rail

IP40

Glacier Edge has capabilities to store data locally and maintain on-site control even during an internet outage. It experiences no downtime due to network issues and automatically syncs any missing data with the cloud once the connection is restored.

- Key features: Dual Ethernet ports, GPS, Intel CPU 4-core 2.5Ghz, 4GB RAM, 126GB SSD, fan-less design, 4x isolated RS-485, Modbus TCP support, Virtual Com ports

Edge solution

GL-PMGW-GE	12 - 24 VDC	2G/LTE	terminal	Edge - Gateway
------------	-------------	--------	----------	----------------

Industrial fieldbus solution

DIN mounting rail

IP40

type	supply voltage	inputs (DI)	outputs (DO)	inputs (AI)	pulse counter
------	----------------	-------------	--------------	-------------	---------------

The PM-MB4442 is a Remote I/O solution designed for use with the Polar Gateway via RS-485. This unit supports 4-20mA analog inputs, pulse counters, and Digital I/O, allowing you to conveniently monitor real-world variables in the Polar Cloud.

Remote I/O solution

PM-MB4442	12 - 24 VDC	4	4	4 (4-20mA)	2
-----------	-------------	---	---	------------	---

Accessories (for Polar related products)

type	gain	mounting	cable	description
PM-A-2	2.5db	magnetic	2m	magnetic base antenna cable
PM-A-28	8db	bracket	5m	omni directional outdoor ant. cable

Advanced remote monitoring and control solution

(H) 240 (W) 190 (D) 125

The Polar Cube combines the Polar Monitoring LTE Gateway and the MB4442 module into an advanced remote monitoring and control system designed for easy installation and versatile application.

- Inputs/Output: 4x AI, 4x DO, 2x DI, 2x pulse counter
- Polar Cube requires Polar Cloud license

GL-CUBE-S	12-24 VDC or 230 VAC	2G/LTE	—	remote monitoring and control solution
-----------	----------------------	--------	---	----------------------------------------

Polar Cube - Applications & Uses

Polar Cloud - Software for Monitoring & Control

Polar Cloud serves as the backbone of the entire Polar Monitoring ecosystem. This user-friendly platform, in conjunction with the Polar Gateway, consolidates and displays crucial data from your field devices in a single location. It also provides the convenience of remote programming and system parameter adjustments.

The Polar Cloud is device and brand agnostic meaning one can monitor a multitude of different devices and brand types from one platform.

General features:

- Remote programming, monitoring, trending
- Alerts and notifications (*SMS and email*)
- Error codes and reporting
- Multiple user access rights
- Device agnostic (*Supports multiple types of devices and applications in one platform*)

Pricing small to medium systems

Polar Site Based Licensing					Subscription options		
Code	I/O tags	Alerts	Schedulers	Up to Gateways	1-Year	2-Year	3-Year
PL-Y-T15	15	2	4	1	-	-	-
PL-Y-T32	32	10	20	2	-	-	-
PL-Y-T50	50	16	32	5	-	-	-
PL-Y-T100	100	32	64	10	-	-	-
PL-Y-T150	150	46	92	20	-	-	-

PL-Y-T1000	1 000	200	400	250	-	-	-

For 2 or 3 year licence option, replace Y with 2Y or 3Y to part number eg. **PL-2Y-T15** for a 2 year licence

Extras

Additional tags, alerts and schedulers can be added to any licence above to extend the offering

Code	description	price per year
PL-Y-AT-1	Additional Tag	-
PL-Y-AA-1	Additional Alerts	-
PL-Y-AS-1	Additional Schedulers	-

* Glacier Edge Gateways require data bundles if connecting to the internet through the embedded SIM

** 3rd party API available

Polar Cloud - Software for Monitoring & Control

Remote Monitoring Solution

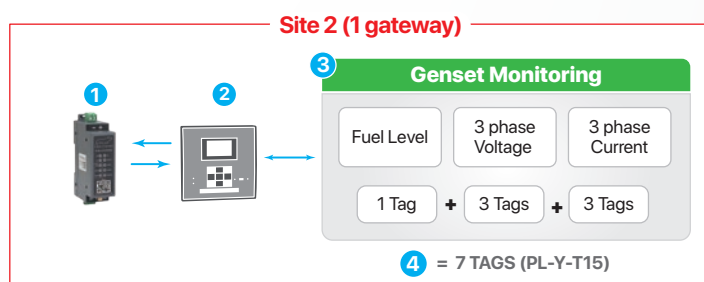

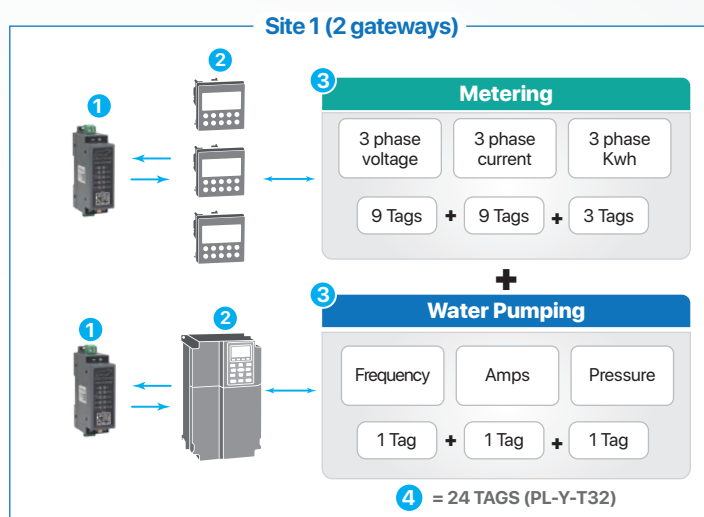

Polar Monitoring's new tag/site based licensing offers a flexible tag based pricing model. Below is an example of how the tag based model works and how you can implement it in your future projects and applications.

- Step 1** Choose Your Gateway (LTE Local, LTE International, or Ethernet)
- Step 2** Select Your Compatible RS485/Modbus RTU Device
- Step 3** Identify Your Monitoring Needs and Calculate Required Tags
- Step 4** Choose a License That Fits Your Requirements

Test the Polar Platform today! Access the Polar Demo Portal via the QR code for a hands-on experience of everything Polar has to offer.

Powerful Simplicity

Monitor and Control your system from anywhere in the world

VTScada award-winning software trusted for real-time monitoring and control of industrial operations. Its user-friendly interface and advanced visualisation make it ideal for all users, ensuring operational excellence across industries.

Key Benefits:

- **User-Friendly Interface:** Designed for both technical and non-technical users.
- **Advanced Visualisation:** Clear and concise data presentation.
- **Scalability:** Ideal for both small and large operations.
- **Operational Excellence:** Reduce costs, enhance safety, increase uptime, and improve compliance.

VTScada Successes

The City of Houston modernised its 400 MGD water purification plant expansion by implementing VTScada, providing real-time monitoring and control over its water and wastewater systems. This upgrade improved efficiency, reduced downtime, and enhanced reliability, ensuring continuous clean water delivery. The user-friendly interface also enabled the team to quickly adapt and optimise processes.

Scan to learn more

Scan to learn more

Bright Alloys, a ferrochrome smelter in South Africa, transformed into a more agile, sustainable, and efficient operation with the implementation of VTScada. This led to a one-third reduction in natural gas consumption, a 10% increase in furnace availability, and a 1% improvement in feed accuracy tolerance, driving better performance and reducing environmental impact.

Scan to learn more

A leading oil and gas producer modernised its operations with VTScada, enabling real-time monitoring and control across its complex infrastructure. This upgrade improved operational efficiency, reduced downtime, and enhanced safety, ensuring continuous production. The intuitive interface also allowed the team to quickly adapt and optimise processes.

VTScada by Trihedral - SCADA system

SCADA (Supervisory Control and Data Acquisition) software is essential for real-time monitoring and control of industrial processes. Providing operators with tools to manage equipment efficiently, analyse data and respond to system alerts. This ensures optimal performance, safety and reliability across various industries.

Advanced SCADA Monitoring and Control with user- friendly design

VTScada an intuitive SCADA software solution designed to simplify complex industrial processes. Combining real-time data acquisition, scalable architecture and integrated alarm management enhancing operational efficiency while reducing learning curves for engineers.

With a customisable interface and extensive support resources, offering a user-centric approach to industrial automation, ensuring that new and experienced users can leverage their full potential.

- Integrated Alarm Management: Real-time event detection to prevent disruptions
- Scalable Architecture: Seamless integration across all system sizes
- Customisable Interface: Tailor your HMI to specific requirements
- Built-in Protocols: Hundreds of device drivers for broad connectivity
- Data Sharing: Integrates external data from 3rd party systems for seamless control
